# Rules on letting this property

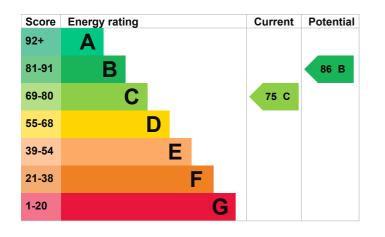

Properties can be let if they have an energy rating from A to E.

You can read guidance for landlords on the regulations and exemptions (https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-landlord-guidance).

## **Energy rating and score**

This property's energy rating is C. It has the potential to be B.

<u>See how to improve this property's energy</u> <u>efficiency</u>.

The graph shows this property's current and potential energy rating.

Properties get a rating from A (best) to G (worst) and a score. The better the rating and score, the lower your energy bills are likely to be.

For properties in England and Wales:

the average energy rating is D the average energy score is 60

# Breakdown of property's energy performance

### Features in this property

Features get a rating from very good to very poor, based on how energy efficient they are. Ratings are not based on how well features work or their condition.

Assumed ratings are based on the property's age and type. They are used for features the assessor could not inspect.

| Feature              | Description                                     | Rating    |
|----------------------|---|-----------|
| Wall                 | Cavity wall, as built, insulated (assumed)      | Good      |
| Roof                 | Pitched, insulated (assumed)                    | Good      |
| Window               | Fully double glazed                             | Average   |
| Main heating         | Boiler and radiators, mains gas                 | Good      |
| Main heating control | Programmer, room thermostat and TRVs            | Good      |
| Hot water            | From main system                                | Good      |
| Lighting             | Low energy lighting in all fixed outlets        | Very good |
| Floor                | Solid, limited insulation (assumed)             | N/A       |
| Floor                | To unheated space, limited insulation (assumed) | N/A       |
| Secondary heating    | None  | N/A       |

#### Primary energy use

The primary energy use for this property per year is 174 kilowatt hours per square metre (kWh/m2).

### How this affects your energy bills

An average household would need to spend **£892 per year on heating, hot water and lighting** in this property. These costs usually make up the majority of your energy bills.

You could save £43 per year if you complete the suggested steps for improving this property's energy rating.

This is **based on average costs in 2025** when this EPC was created. People living at the property may use different amounts of energy for heating, hot water and lighting.

#### Heating this property

Estimated energy needed in this property is:

- 8,071 kWh per year for heating
- 2,018 kWh per year for hot water

## Impact on the environment

| nent                  | This property produces  | 2.7 tonnes of CO2  |
|-----------------------|---|--|

# Who to contact about this certificate

### Contacting the assessor

If you're unhappy about your property's energy assessment or certificate, you can complain to the assessor who created it.

| Assessor's name | Paul Easton            |
|-----------------|------------------------|
| Telephone       | 0203 397 8220          |
| Email           | support@propcert.co.uk |

### Contacting the accreditation scheme

If you're still unhappy after contacting the assessor, you should contact the assessor's accreditation scheme.

| Accreditation scheme | Elmhurst Energy Systems Ltd    |
|----------------------|--------------------------------|
| Assessor's ID        | EES/013300                     |
| Telephone            | 01455 883 250                  |
| Email                | enquiries@elmhurstenergy.co.uk |

### About this assessment
